

The Church Insurance Company

Preferred way to handle storm damage claims:

- 1) Report damage and obtain claim number by calling 1/800-223-5705.
- 2) Take photos. Not a necessity but could be helpful.
- 3) Obtain a written estimate from a licensed contractor. Have Contractor provide proof of General Liability and Worker's Compensation Insurance. More than one estimate is preferable but not necessary under these circumstances.
- 4) Secure the damaged areas.
- 5) Start repairs.
- 6) An adjustor will be sent out but you do not have to wait for the adjustor to begin repairs. That is why you have written estimates and photos of damage.
- 7) Do not have volunteers using chain saws and removing debris from roofs, etc. many deaths and major injuries have occurred from unskilled people performing tasks for which they are not trained or skilled.
- 8) File your receipts with the Church Insurance Company. In many cases what is not paid for in one portion of the policy may be paid for in another.
